

**Morgan Creek - Exos Active SPAC Arbitrage ETF (CSH)
a series of Listed Funds Trust (the “Trust”)**

**Supplement dated February 21, 2023
to the Summary Prospectus, Prospectus and Statement of Additional Information
dated January 26, 2022**

After careful consideration, and at the recommendation of Morgan Creek Capital Management, LLC, the investment adviser to the Morgan Creek - Exos Active SPAC Arbitrage ETF (the “Fund”), the Board of Trustees of Listed Funds Trust approved the closing and subsequent liquidation of the Fund pursuant to the terms of a Plan of Liquidation. Accordingly, the Fund is expected to cease operations, liquidate its assets, and distribute the liquidation proceeds to shareholders of record on or about March 24, 2023 (the “Liquidation Date”). Shares of the Fund are listed on the NYSE Arca, Inc.

Beginning on or about February 22, 2023 and continuing through the Liquidation Date, the Fund will liquidate its portfolio assets. As a result, during this period, the Fund will increase its cash holdings and deviate from its investment objective, investment strategies, and investment policies as stated in the Fund’s Prospectus and SAI.

The Fund will no longer accept orders for new creation units after the close of business on the business day prior to the Liquidation Date, and trading in shares of the Fund will be halted prior to market open on the Liquidation Date. Prior to the Liquidation Date, shareholders may only be able to sell their shares to certain broker-dealers, and there is no assurance that there will be a market for the Fund’s shares during that time period. Customary brokerage charges may apply to such transactions.

If no action is taken by a Fund shareholder prior to the Liquidation Date, the Fund will distribute to such shareholder, on or promptly after the Liquidation Date, a liquidating cash distribution equal to the net asset value of the shareholder’s Fund shares as of the close of business on the Liquidation Date. This amount will include any accrued capital gains and dividends. Shareholders remaining in the Fund on the Liquidation Date will not be charged any transaction fees by the Fund. The liquidating cash distribution to shareholders will be treated as payment in exchange for their shares. The liquidation of your shares may be treated as a taxable event. Shareholders should contact their tax adviser to discuss the income tax consequences of the liquidation.

Shareholders can call 1-855-857-2677 for additional information.

MORGAN CREEK-EXOS ACTIVE SPAC ARBITRAGE ETF - FUND SUMMARY

Investment Objective

The Morgan Creek-Exos Active SPAC Arbitrage ETF (the “Fund”) seeks to preserve capital and provide incremental total return.

Fees and Expenses of the Fund

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Shareholder Fees (<i>fees paid directly from your investment</i>)	None
Annual Fund Operating Expenses (<i>expenses that you pay each year as a percentage of the value of your investment</i>)	
Management Fee	1.25%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	1.25%

¹ Estimated for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year: \$127 **3 Years:** \$397

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in the Total Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund is actively managed using a strategy designed around the unique characteristics of “Pre-Combination” (defined below) SPAC securities. Under normal market conditions, the Fund seeks to achieve its investment objective by investing primarily in units made up of common stock, warrants and rights of U.S.-listed special purpose acquisition companies (“SPACs”). A right is a privilege granted to existing holders of a company’s stock to receive additional shares of the common stock before it is offered to the public. A warrant is a derivative that gives the right, but not the obligation, to buy or sell a security at a certain price prior to expiration. Exos Asset Management, LLC (the “Sub-Adviser”) is responsible for the day-to-day management of the Fund with the oversight of Morgan Creek Capital Management, LLC (the “Adviser”).

A SPAC is a “blank check” company with no commercial operations that is designed to raise capital via an initial public offering (“IPO”) for the purpose of engaging in a merger, acquisition, reorganization, or similar business combination (a “Combination”) with one or more operating companies. Sponsors of SPACs typically pay the SPAC’s offering costs and underwriting fees and contribute all or a portion of its working capital in exchange for participation in the common stock and derivatives (such as warrants and rights) of the SPAC. A SPAC IPO typically involves the sale of units consisting of one share of common stock and a warrant or right (or portion of a warrant or right) to purchase common stock at a fixed price upon or after the consummation of a Combination. The capital raised in the IPO is typically placed into a trust. The proceeds of the IPO may be used only to consummate a Combination and for other limited purposes such as paying taxes owed by the SPAC. “Pre-Combination” SPACs are SPACs that are either seeking a target for a Combination or have not yet completed a Combination with an identified target. Pre-Combination SPACs often have predetermined time frames to consummate a Combination (typically two years) or the SPAC will seek to extend the time frame or liquidate. “Post-Combination” SPACs are operating companies that have completed a Combination with a SPAC. The Fund generally will not hold a SPAC’s common stock past the date on which it no longer has the ability to redeem for its share of the underlying collateral held in trust but may, in limited circumstances, continue to hold the rights or warrants on a Post-Combination SPAC

security. Under normal circumstances, at least 80% of the Fund's net assets, plus borrowings for investment purposes, will be invested in Pre-Combination SPACs.

At times, the Fund may utilize leverage in the form of borrowing, which would typically be in the form of loans from banks or other lenders, that may be on a secured or unsecured basis and at fixed or variable rates of interest. The Fund may borrow funds collateralized by its assets to invest in the shares of Pre-Combination SPACs. Generally, Fund borrowing may be used to acquire SPACs trading in the secondary market at a discount to their collateralization or trust asset value. Fund borrowing may be zero at any time. Consistent with applicable regulations, the Fund will maintain an asset coverage ratio (*i.e.*, the value of the Fund's assets over the Fund's borrowings) of 300% or higher.

The Fund is considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a lesser number of issuers than if it were a diversified fund. The SPACs in which the Fund invests will generally be small or mid-capitalization companies.

Investment Sub-Adviser's Process. The Fund is actively managed using a strategy designed around the unique characteristics of Pre-Combination SPAC securities. The Fund seeks to protect capital at all times via its ability to redeem its shares in SPACs for Treasury bill collateral held in trust, while seeking to generate incremental return via actively trading SPAC securities to extract value from both the underlying collateral and the embedded optionality inherent in the securities. That is, SPAC securities have equity options embedded in them both explicitly (*i.e.*, warrants and rights that are part of a SPAC unit which can be detached and traded separately from the common stock after a minimum holding period) and implicitly (*i.e.*, if the common stock trades above the SPAC redemption value). The Sub-Adviser evaluates potential SPAC investments by seeking to identify those it believes are more likely to: (i) complete a merger, (ii) complete a merger in a short period of time; and (iii) generate above-average performance. The Sub-Adviser considers a variety of factors, including a SPAC's history and relationships, area of focus, and its management team's ability to raise outside capital. Potential SPAC investments are also analyzed using a proprietary framework that estimates the potential return of each security taking into account (i) the stated return to trust value and (ii) the estimated value of the embedded options. The Sub-Adviser will make a determination as to whether to continue to hold an individual SPAC security beyond the initial time period within which the SPAC has to complete a Combination if such time frame is extended because the SPAC has not yet completed a Combination. In such cases, the Sub-Adviser will consider similar criteria, including any additional capital invested in the SPAC and the estimated return from the embedded options. In implementing the Fund's strategy, the Sub-Adviser seeks to:

- harvest return on deals that trade above collateral value;
- monetize the value of warrants and rights embedded in SPAC units it buys at or below collateral value;
- buy issues at a discount to collateral value to lock in embedded return;
- add overall exposure as SPACs get cheaper relative to their collateral value and reduce overall exposure as SPACs get more expensive relative to their collateral value;
- generally recycle capital by selling the Fund's investment in individual SPACs that are trading above collateral value and reinvesting the proceeds into SPACs trading at or below collateral value; and
- adjust the portfolio at advantageous prices by placing buy orders on the bid or worse, and placing sell orders on the offer or better, in order to earn the spread between the bid and offer.

Principal Investment Risks

The principal risks of investing in the Fund are summarized below. The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. The following risks could affect the value of your investment in the Fund:

- **Associated Risks of Pre-Combination SPACs.** The Fund invests in equity securities, warrants and rights of SPACs, which raise funds to seek potential Combination opportunities. Unless and until a Combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. If a Combination that meets the requirements for the SPAC is not completed within a pre-established period of time (*e.g.*, 18-24 months), the invested funds are generally returned to the entity's shareholders (less any applicable taxes, fees, and administrative expenses); however, in certain cases, the SPAC may extend its period of operations beyond the initial pre-established period of time. If this occurs, a fund investing in the SPAC may have difficulty redeeming its holdings, or may not be able to do so at a desirable time. Because SPACs have no operating history or ongoing business other than seeking Combinations, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable Combination. There is no guarantee that the SPACs in which the Fund invests will complete a Combination or that any Combination that is completed will be profitable. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial Combination because certain stockholders, including stockholders affiliated with the management or the sponsor of the SPAC, may have sufficient voting power, and a financial

incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a Combination even though a majority of its public stockholders do not support such a Combination. Although redemption rights are generally granted to all public shareholders regardless of how they vote, exchange rules may only oblige SPACs to offer redemption rights to shareholders that vote against a Combination. Some SPACs may pursue Combinations only within certain industries or regions, which may increase the volatility of their prices. Additionally, SPAC securities, which are typically traded in the over-the-counter market, may be considered illiquid and/or be subject to restrictions on resale or redemption, which may have the effect of discouraging shareholders from accumulating large blocks of SPAC holdings.

- **Borrowing and Leverage Risk.** Borrowing magnifies the potential for gain or loss by the Fund and, therefore, increases the possibility of fluctuation in the Fund's NAV. This is the speculative factor known as leverage. Because the Fund's investments will fluctuate in value, while the interest on borrowed amounts may be fixed, the Fund's NAV may tend to increase more as the value of its investments increases, or to decrease more as the value of its investments decreases, during times of borrowing. Unless profits on investments acquired with borrowed funds exceed the costs of borrowing, the use of borrowing will cause the Fund's investment performance to decrease. Borrowing also may cause the Fund to liquidate positions under adverse market conditions to satisfy its repayment obligations. Borrowing increases the risk of loss and may increase the volatility of the Fund.
- **Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors or companies in which the Fund invests. Common stock, warrants, and rights are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **ETF Risks.** The Fund is an ETF, and, as a result of its structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as Authorized Participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listed exchange is open, the Fund is likely to experience premiums or discounts greater than those of domestic ETFs.
 - *Trading.* Although Shares are listed for trading on the NYSE Arca, Inc. (the "Exchange") and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Illiquidity Risk.** Illiquidity risk exists when particular investments are difficult to purchase or sell, possibly preventing the Fund from selling these illiquid investments at an advantageous price or at the time desired. A lack of liquidity may also cause the value of investments to decline. Illiquid investments may also be difficult to value.
- **Management Risk.** The Sub-Adviser continuously evaluates the Fund's holdings, purchases and sales with a view to achieving the Fund's investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Adviser's judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment.
- **Market Capitalization Risk.**
 - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.

- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund’s NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of these factors, including the impact of the coronavirus (COVID-19) pandemic and related public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.
- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Portfolio Turnover Risk.** Because the Fund may “turn over” some or all of its portfolio frequently, the Fund may incur high levels of transaction costs from commissions or mark-ups in the bid/offer spread. Higher portfolio turnover (*e.g.*, in excess of 100% per year) may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders.
- **Rights and Warrants Risk.** The Fund may purchase rights and warrants and rights to purchase equity securities. Investments in warrants or rights are pure speculation in that they have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. They do not represent ownership of the securities, but only the right to buy them. Warrants and rights and warrants involve the risk that the Fund could lose the purchase value of the warrant or right if the warrant or right is not exercised or sold prior to its expiration.
 - *Post-Combination SPAC Warrants.* Although the Fund generally will not hold the common stock of a Post-Combination SPAC, the Fund may hold warrants to buy the stock of companies that are derived from a SPAC. Post-Combination SPACs may be unseasoned and lack a trading history, a track record of reporting to investors, and widely available research coverage. Post-Combination SPACs are thus often subject to extreme price volatility and speculative trading. The stocks underlying the warrants may have above average price appreciation that may not continue and the performance of these stocks may not replicate the performance exhibited in the past, which could adversely affect the value of the warrants the Fund holds.
- **Tax Risk.** The investment in equity securities of SPACs introduces complexities beyond typical equity investments and may introduce tax risks to the Fund. In particular, certain non-U.S. SPACs may be treated as “passive foreign investment companies” (“PFICs”) under the Code, thereby causing the Fund to be subject to special tax rules. If a SPAC is classified as a PFIC, the Fund may be subject to U.S. federal income tax on a portion of any “excess distribution” or gain from the disposition of shares in the PFIC even if such income is distributed as a taxable dividend by the Fund to its shareholders. Additional charges in the nature of interest may be imposed on a Fund in respect of deferred taxes arising from such distributions or gains unless the Fund makes certain elections. See “Federal Income Taxes—Foreign Investments” in the SAI for additional information.

Performance

The Fund is new and therefore does not have a performance history for a full calendar year. In the future, performance information for the Fund will be presented in this section. Updated performance information is available on the Fund’s website at www.csh-etf.com.

Portfolio Management

<i>Adviser</i>	Morgan Creek Capital Management, LLC
<i>Sub-Adviser</i>	Exos Asset Management, LLC
<i>Portfolio Manager</i>	Dewey Tucker Partner and Portfolio Manager of the Sub-Adviser, has been the portfolio manager of the Fund since its inception in January 2022.

Purchase and Sale of Shares

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on the Exchange, and individual Shares may only be bought and sold in the secondary market through a broker or dealer at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. The difference in the bid and ask prices is referred to as the “bid-ask spread.”

Recent information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at www.csh-etf.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUND

Investment Objective

The Fund's investment objective has been adopted as a non-fundamental investment policy and may be changed without shareholder approval upon written notice to shareholders.

Principal Investment Strategies

The following information is in addition to, and should be read along with, the description of the Fund's principal investment strategies in the section titled "Fund Summary—Principal Investment Strategies" above.

In accordance with Rule 35d-1 under the Investment Company Act of 1940 (the "1940 Act"), the Fund has adopted a non-fundamental investment policy to invest, under normal circumstances, at least 80% of its net assets (plus the amount of any borrowing for investment purposes) in Pre-Combination SPACs. Such policy may be changed without shareholder approval upon 60 days' written notice to the Fund's shareholders.

Temporary Defensive Positions. For temporary defensive purposes during adverse market, economic, political or other conditions, the Fund may invest in cash or cash equivalents or short-term instruments such as commercial paper, money market mutual funds, or short-term U.S. government securities. Taking a temporary defensive position may result in the Fund not achieving its investment objective.

Principal Investment Risks

An investment in the Fund entails risks. The Fund could lose money, or its performance could trail that of other investment alternatives. The following provides additional information about the Fund's principal risks. It is important that investors closely review and understand these risks before making an investment decision. Just as in the Fund's summary section, the principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears.

- **Associated Risks of Pre-Combination SPACs.** The Fund invests in equity securities, warrants and rights of SPACs, which raise funds to seek potential Combination opportunities. Unless and until a Combination is completed, a SPAC generally invests its assets in U.S. government securities, money market securities, and cash. If a Combination that meets the requirements for the SPAC is not completed within a pre-established period of time (e.g., 18-24 months), the invested funds are generally returned to the entity's shareholders (less any applicable taxes, fees, and administrative expenses); however, in certain cases, the SPAC may extend its period of operations beyond the initial pre-established period of time. If this occurs, a fund investing in the SPAC may have difficulty redeeming its holdings, or may not be able to do so at a desirable time. Because SPACs have no operating history or ongoing business other than seeking Combinations, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable Combination. There is no guarantee that the SPACs in which the Fund invests will complete a Combination or that any Combination that is completed will be profitable. Public stockholders of SPACs may not be afforded a meaningful opportunity to vote on a proposed initial Combination because certain stockholders, including stockholders affiliated with the management or the sponsor of the SPAC, may have sufficient voting power, and a financial incentive, to approve such a transaction without support from public stockholders. As a result, a SPAC may complete a Combination even though a majority of its public stockholders do not support such a Combination. Although redemption rights are generally granted to all public shareholders regardless of how they vote, exchange rules may only oblige SPACs to offer redemption rights to shareholders that vote against a Combination. Some SPACs may pursue Combinations only within certain industries or regions, which may increase the volatility of their prices. Additionally, SPAC securities, which are typically traded in the over-the-counter market, may be considered illiquid and/or be subject to restrictions on resale or redemption, which may have the effect of discouraging shareholders from accumulating large blocks of SPAC holdings.
- **Borrowing and Leverage Risk.** Borrowing magnifies the potential for gain or loss by the Fund and, therefore, increases the possibility of fluctuation in the Fund's net asset values. This is the speculative factor known as leverage. Because the Fund's investments will fluctuate in value, while the interest on borrowed amounts may be fixed, the Fund's net asset value may tend to increase more as the value of its investments increases, or to decrease more as the value of its investments decreases, during times of borrowing. Unless profits on investments acquired with borrowed funds exceed the costs of borrowing, the use of borrowing will cause the Fund's investment performance to decrease.
- **Equity Market Risk.** Common stocks, warrants and rights are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including: expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. If you held common stock, or common stock equivalents, of any given issuer, you would generally be exposed to greater risk than if you held preferred stocks and debt obligations of the issuer because common stockholders, or holders of equivalent interests, generally have inferior rights to receive payments from issuers in comparison with the rights of preferred stockholders, bondholders, and other creditors of such issuers.

Beginning in the first quarter of 2020, financial markets in the United States and around the world experienced extreme and in many cases unprecedented volatility and severe losses due to the global pandemic caused by COVID-19, a novel coronavirus. The pandemic has resulted in a wide range of social and economic disruptions, including closed borders, voluntary or compelled quarantines of large populations, stressed healthcare systems, reduced or prohibited domestic or international travel, supply chain disruptions, and so-called “stay-at-home” orders throughout much of the United States and many other countries. The fall-out from these disruptions has included the rapid closure of businesses deemed “non-essential” by federal, state, or local governments and rapidly increasing unemployment, as well as greatly reduced liquidity for certain instruments at times. Some sectors of the economy and individual issuers have experienced particularly large losses. Such disruptions may continue for an extended period of time or reoccur in the future to a similar or greater extent. In response, the U.S. government and the Federal Reserve have taken extraordinary actions to support the domestic economy and financial markets, resulting in very low interest rates and in some cases negative yields. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **ETF Risks.** The Fund is an ETF, and, as a result of its structure, it is exposed to the following risks:
 - *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
 - *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the difference between the price at which an investor is willing to buy Shares (the “bid” price) and the price at which an investor is willing to sell Shares (the “ask” price). This difference in bid and ask prices is often referred to as the “spread” or “bid/ask spread.” The bid/ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Shares, including bid/ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
 - *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund’s NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a “bid/ask” spread charged by the exchange specialist, market makers or other participants that trade Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. The Adviser believes that, under normal market conditions, large market price discounts or premiums to NAV will not be sustained because of arbitrage opportunities.
 - *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange “circuit breaker” rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 Index during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund’s underlying portfolio holdings, which can be significantly less liquid than Shares.
- **Illiquidity Risk.** Illiquidity risk exists when particular investments are difficult to purchase or sell, possibly preventing the Fund from selling these illiquid investments at an advantageous price or at the time desired. A lack of liquidity may also cause the value of investments to decline. Illiquid investments may also be difficult to value.

- **Management Risk.** The Sub-Adviser continuously evaluates the Fund’s holdings, purchases and sales with a view to achieving the Fund’s investment objective. However, achievement of the stated investment objective cannot be guaranteed. The Sub-Adviser’s judgment about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these factors may affect the return on your investment. In fact, no matter how good a job the Sub-Adviser does, you could lose money on your investment in the Fund, just as you could with other investments. If the Sub-Adviser is incorrect in its assessment of the income, growth or price realization potential of the Fund’s holdings or incorrect in its assessment of general market or economic conditions, then the value of the Fund’s shares may decline.
- **Market Capitalization Risk.**
 - *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large capitalization stocks or the stock market as a whole.
 - *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.
- **Market Risk.** The trading prices of securities and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund’s NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time. U.S. and international markets have experienced significant periods of volatility in recent years due to a number of economic, political and global macro factors, including public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions and the threat of tariffs imposed by the U.S. and other countries. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, which could have an adverse effect on the Fund.

The respiratory illness COVID-19 caused by a novel coronavirus has resulted in a pandemic and major disruption to economies and markets around the world, including the United States. The pandemic has resulted in a wide range of social and economic disruptions, including closed borders, voluntary or compelled quarantines of large populations, stressed healthcare systems, reduced or prohibited domestic or international travel, supply chain disruptions, and so-called “stay-at-home” orders throughout much of the United States and many other countries. Financial markets have experienced extreme volatility and severe losses, and trading in many instruments has been disrupted. Some sectors of the economy and individual issuers have experienced particularly large losses. Such disruptions may continue for an extended period of time or reoccur in the future to a similar or greater extent. Liquidity for many instruments has been greatly reduced for periods of time. In response to these disruptions, the U.S. government and the Federal Reserve have taken extraordinary actions to support the domestic economy and financial markets, resulting in very low interest rates and in some cases negative yields. It is unknown how long circumstances related to the pandemic will persist, whether they will reoccur in the future, whether efforts to support the economy and financial markets will be successful, and what additional implications may follow from the pandemic. The impact of these events and other epidemics or pandemics in the future could adversely affect Fund performance.

- **New Fund Risk.** The Fund is a recently organized investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision. Moreover, investors will not be able to evaluate the Fund against one or more comparable funds on the basis of relative performance until the Fund has established a track record.
- **Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a lesser number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a lesser number of issuers than a fund that invests more widely. This may increase the Fund’s volatility and cause the performance of a relatively small number of issuers to have a greater impact on the Fund’s performance.
- **Portfolio Turnover Risk.** Because the Fund may “turn over” some or all of its positions as frequently as monthly, the Fund may incur high levels of transaction costs from commissions or mark-ups in the bid/offer spread. Higher portfolio turnover may result in the Fund paying higher levels of transaction costs and generating greater tax liabilities for shareholders. Portfolio turnover risk may cause the Fund’s performance to be less than you expect. While the turnover of the warrants and rights is not deemed “portfolio turnover” for accounting purposes, the economic impact to the Fund is similar to what could occur if the Fund experienced high portfolio turnover (e.g., in excess of 100% per year).

- **Rights and Warrants Risk.** The Fund may purchase warrants and rights to purchase equity securities. Investments in warrants and rights are pure speculation in that they have no voting rights, pay no dividends and have no rights with respect to the assets of the corporation issuing them. They do not represent ownership of the securities, but only the right to buy them. The prices of warrants and rights (if traded independently) and warrants do not necessarily move parallel to the prices of the underlying securities. Warrants and rights involve the risk that the Fund could lose the purchase value of the warrant or right if the warrant or right is not exercised prior to its expiration. They also involve the risk that the effective price paid for the warrant or rights added to the subscription price of the related security may be greater than the value of the subscribed security’s market price.
 - *Post-Combination SPAC Warrants.* Although the Fund generally will not hold the common stock of a Post-Combination SPAC, the Fund may hold warrants to buy the stock of companies that are derived from a SPAC. Post-Combination SPACs may be unseasoned and lack a trading history, a track record of reporting to investors, and widely available research coverage. Post-Combination SPACs are thus often subject to extreme price volatility and speculative trading. The stocks underlying the warrants may have above average price appreciation that may not continue and the performance of these stocks may not replicate the performance exhibited in the past, which could adversely affect the value of the warrants the Fund holds.
- **Tax Risk.** The investment in equity securities of SPACs introduces complexities beyond typical equity investments and may introduce tax risks to the Fund. In particular, certain non-U.S. SPACs may be treated as “passive foreign investment companies” (“PFICs”) under the Code, thereby causing the Fund to be subject to special tax rules. If a SPAC is classified as a PFIC, the Fund may be subject to U.S. federal income tax on a portion of any “excess distribution” or gain from the disposition of shares in the PFIC even if such income is distributed as a taxable dividend by the Fund to its shareholders. Additional charges in the nature of interest may be imposed on a Fund in respect of deferred taxes arising from such distributions or gains unless the Fund makes certain elections. See “Federal Income Taxes—Foreign Investments” in the SAI for additional information.

PORTFOLIO HOLDINGS INFORMATION

Information about the Fund’s daily portfolio holdings is available at www.csh-etf.com. A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s Statement of Additional Information (“SAI”).

MANAGEMENT

Investment Adviser

Morgan Creek Capital Management, LLC, located at 301 W. Barbee Chapel Road, Suite 200, Chapel Hill, North Carolina 27517, serves as the investment adviser for the Fund. The Adviser, subject to the oversight of the Board, provides investment management and operational oversight of the Sub-Adviser. The Adviser also arranges for transfer agency, custody, fund administration, distribution and all other services necessary for the Fund to operate. The Adviser is an SEC-registered investment adviser that provides investment advisory services to separately managed accounts and sub-advisory services to institutional clients, in addition to providing investment advisory services to the Fund. As of December 31, 2021, the Adviser had approximately \$2.2 billion in assets under management.

For the services it provides to the Fund, the Adviser is entitled to a unified management fee, which is calculated daily and paid monthly, at an annual rate based on the Fund’s average daily net assets as set forth in the table below.

Fund	Management Fee
Morgan Creek-Exos Active SPAC Arbitrage ETF	1.25%

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser (the “Advisory Agreement”), the Adviser has agreed to pay all expenses of the Fund except the fee paid to the Adviser under the Advisory Agreement, interest charges on any borrowings, dividends, and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution (12b-1) fees and expenses (if any). The Adviser, in turn, compensates the Sub-Adviser from the management fee it receives.

The basis for the Board’s approval of the Advisory Agreement will be available in the Fund’s first Annual or Semi-Annual Report to Shareholders.

Sub-Adviser

Exos Asset Management, LLC, a Delaware limited liability company located at 1370 Broadway, Suite 1450, New York, New York 10018, serves as sub-adviser to the Fund. An SEC-registered investment adviser formed in 2019, the Sub-Adviser is majority owned by Exos TFP Holdings LLC. As of December 31, 2021, the Sub-Adviser had approximately \$679.5 million in assets under management.

Pursuant to a sub-advisory agreement between the Trust, on behalf of the Fund, the Adviser and the Sub-Adviser (the “Sub-Advisory Agreement”), subject to the oversight of the Adviser and the Board, the Sub-Adviser is responsible for the day-to-day investment

management and operations of the Fund's portfolio, including selecting broker-dealers to execute purchase and sale transactions. For its services, the Sub-Adviser is entitled to a fee paid by the Adviser, which fee is calculated daily and paid monthly, at a rate of 0.75% of the Adviser's management fee, net of Fund expenses paid by the Adviser and expenses paid by the Adviser related to the statutory distributor.

The basis for the Board's approval of the Sub-Advisory Agreement will be available in the Fund's first Annual or Semi-Annual Report to Shareholders.

Portfolio Manager

Dewey Tucker is the Fund's Portfolio Manager and is responsible for day-to-day management of the Fund's portfolio.

Mr. Tucker has over 14 years of experience in financial markets. In October 2017, he joined the Sub-Adviser as Partner, Head of Trading Strategies. Mr. Tucker began his career at Knight Capital Group in January 2005, developing trading strategies for the automated equities market making business. He later transitioned to managing a variety of proprietary trading strategies at Knight Capital Americas, LLC and then KCG Americas LLC, specifically focused on equities, futures, and fixed income market making. Mr. Tucker has a Ph.D. from MIT in Electrical Engineering, specializing in statistical signal processing and probabilistic modeling.

The Fund's SAI provides additional information about the Portfolio Manager's compensation structure, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of Shares.

Other Service Providers

Forside Fund Services, LLC (the "Distributor"), is the principal underwriter and distributor of the Fund's shares. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor will not distribute shares in less than whole Creation Units, and it does not maintain a secondary market in the shares. The Distributor is a broker-dealer registered under the Securities Exchange Act of 1934 and a member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund and is not affiliated with the Adviser, Sub-Adviser, or any of their affiliates.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services, located at 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the administrator and transfer agent for the Fund.

U.S. Bank National Association, located at 1555 N. Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212, serves as the custodian for the Fund.

Morgan, Lewis & Bockius LLP, located at 1111 Pennsylvania Avenue, N.W., Washington, D.C. 20004, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the Fund's independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

HOW TO BUY AND SELL SHARES

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Fund's transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its

participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” through your brokerage account.

Frequent Purchases and Redemptions of Shares

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with NAV. As such, the Fund accommodates frequent purchases and redemptions by APs. However, frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

The Fund’s NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange (“NYSE”), generally 4:00 p.m. Eastern time, each day the NYSE is open for business. The NAV is calculated by dividing the Fund’s net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. The values of non-U.S. dollar denominated securities are converted to U.S. dollars using foreign currency exchange rates generally determined as of 4:00 p.m., London time. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below).

Fair Value Pricing

The Board has adopted procedures and methodologies to fair value Fund securities whose market prices are not “readily available” or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been de-listed or has had its trading halted or suspended; (ii) a security’s primary pricing source is unable or unwilling to provide a price; (iii) a security’s primary trading market is closed during regular market hours; or (iv) a security’s value is materially affected by events occurring after the close of the security’s primary trading market. Generally, when fair valuing a security, the Fund will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer’s business, recent trades or offers of the security, general and/or specific market conditions and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or Sub-Adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in section 12(d)(1), subject to certain terms and conditions, including that such investment companies enter into an agreement with the Fund.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

The Fund may pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually. The Fund will declare and pay capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

Taxes

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax adviser about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”). If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (APs only).

Taxes on Distributions

The Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned his or her Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates of up to 20% (lower rates apply to individuals in lower tax brackets). Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the amount and character of any distributions received from the Fund.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares' NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. Gains from the sale or other disposition of your Shares from non-U.S. shareholders generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if a tax treaty applies.

Under legislation generally known as "FATCA" (the Foreign Account Tax Compliance Act), the Fund is required to withhold 30% of certain ordinary dividends it pays to shareholders that are foreign entities and that fail to meet prescribed information reporting or certification requirements.

Under the "backup withholding" provisions of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), the Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage (currently 24%) of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding.

Backup withholding is not an additional tax. Any amounts withheld under the backup withholding rules may be allowed as a refund or a credit against a holder's U.S. federal income tax liability, provided the required information is timely furnished to the Internal Revenue Service.

Taxes When Shares Are Sold on the Exchange

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares of the Fund are acquired, including through

reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of Shares. The ability to deduct capital losses may be limited.

The cost basis of Shares of the Fund acquired by purchase will generally be based on the amount paid for the Shares and then may be subsequently adjusted for other applicable transactions as required by the Internal Revenue Code. The difference between the selling price and the cost basis of Shares generally determines the amount of the capital gain or loss realized on the sale or exchange of Shares. Contact the broker through whom you purchased your Shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP's aggregate basis in the securities delivered, plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP's basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The Internal Revenue Service may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for an AP who does not mark-to-market its holdings) or on the basis that there has been no significant change in economic position. APs exchanging securities should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Net Investment Income Tax

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (generally including capital gains distributions and capital gains realized on the sale of Shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax adviser about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.

DISTRIBUTION PLAN

The Board has adopted a Distribution and Service Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV per share is available on the Fund's website at www.csh-etf.com.

ADDITIONAL NOTICES

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser, the Sub-Adviser, and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

FINANCIAL HIGHLIGHTS

Financial information is not available because the Fund had not commenced operations prior to the date of this Prospectus.
